# Practical Internet Security

## □ Aim:

- Internet security is a branch of computer security specifically related to the Internet. Its objective is to establish rules and measures to use against attacks over the Internet.
- ✓ The aim of this research is to study different types of security, ways to attack Internet gadgets, modern tools to use against attacks, etc.

# Prof. Hamada: Research Directions

# Proposed projects

- **Intelligent Interactive Multimedia Learning Framework**
- **A Smart media-based recommendation system**
- **Adaptive Learning Framework**

# Intelligent Interactive Multimedia Learning Framework

## Example:

The project will consist of basic modules:

- Artificial Intelligence: Facial recognition
- Multimedia Learning Module
- Learning Style Module
